

A Guide to Event and Distance Books

Event books:

Green Book – Used to record events through 50. First award level at 10; second level at 30 and third level at 50. When the green book is used for 10 events, the second page should not be filled out. For the 30 and 50 levels, all lines are used. Send in your book(s) when they are filled to the appropriate level and purchase a new one to continue to the next level.

Purple Book – When the green 50 event book has been completed, the participant graduates to the purple book. This book has lines for 25 events and is used for recording event number 51 through 600.

Rose Book – Used after a participant has completed 600 events. Records 50 events and is used for event number 601 through 1,500.

Gold Book – Used after the participant has completed 1,500 events. Records 100 events and is the highest event book.

Distance Books:

Blue Book – Holds 500km and is used at increments of 500km through 8,000km. If a person does only short walks (5km), it will take all the spaces to total 500km. If an individual does medium or long walks, it will take only part of the book to make 500km. All the lines in this book do not need to be used – only those lines needed to bring the total to 500km. Any distance more than 500 kilometers will be carried over to the next distance book when you send the books in for processing. Persons having completed distances less than 10km may use the insert cards for additional lines to get the required distances for awards.

Orange Books – After a participant has completed 8,000km, they move to the orange book. This book holds 1,000km for each level and is used through 22,000km.

Yellow Book – After a participant has completed 22,000km, they graduate to the yellow book. This book holds 5,000km for each award level and is the highest distance book.

Bicycling Distance Book:

Brown Book – Used for recording distance credit for participation in bike events ONLY. This book records up to 5,000km.

*Useful hints – Do NOT cut and paste in books, use insert cards only.

- Make sure kilometer distances are legible.

- Always feel free to call or e-mail.*
